

CAROZ

The introduction of L2 for CAROZ **increased the efficiency of booking, planning and finance processes** for several customers **with 50%** and **saved 10% on transport costs** by always selecting the right carrier for the right job.

The challenge

- Invoice checking was time consuming- requiring contract/rate maintenance, manual calculations and checks in Excel.
- Legacy systems required a lot of manual data entry
- Carrier selection not always based on comparing them like for like for each shipment.

The solution

- The rates in the ProcurementManager combined with shipment specifications in the ShipmentManager automatically calculate the correct rate per shipment. The carrier can see its shipments on the web to check the rates. Per set period all amounts are matched and invoicing can be done based on the self-billing principle.
- The customer determines the logic which orders can be combined into 1 shipment (the consolidation key) and which carrier to select, in every situation; cheapest, quickest or any other preference.
- The ShipmentManager interfaces all data from and to the ERP and the carriers- no manual data entry is needed.

The results

- **A 50 % increase in the efficiency of planning and finance processes**
- **A 10% saving on transport costs**
- **An extra 5% saved by eliminating invoicing errors from carriers**

Ruud Claessens, CEO CAROZ:

“Informore is a very flexible company, if something needs to be done within one hour, it will be done within one hour. It is very easy to work with Informore.”

About CAROZ

Since its origin in 1999 CAROZ has gone through a real evolution. Years of experience in managing logistics flows provide a solid practical basis. Because of the growth of the company it has attracted experts in road-, barge-, rail-, sea-, and air transport. Combined with young academics from various disciplines, CAROZ puts a unique combination on the market. This combination enables it to become one of the trendsetters in the sector. Together with its customers , CAROZ determine the new standard in logistics.

Pieter Jongens, CEO Informore:

“Informore is proud to see its L2 system being used for the Dr James services Caroz provides to its customers .”
